

What Can I Do with a Career in Information Systems?

There are new technologies being developed and large amounts of data being collected, organized, and analyzed in all industries. According to the Occupational Outlook Handbook, there will be a demand for workers who are skilled in the areas of cloud computing, the collection and storage of big data, and information security. Overall, the employment of computer and information technology occupations is projected to grow 13 percent from 2016 to 2026, faster than the average for all occupations.
